PicoNova

Picosecond Laser Platform

500 ps / 532, 755 & 1064 nm

Designed around your practice.

PicoNova brings picosecond pulse delivery and a choice of three wavelengths into a single aesthetic laser platform.

System at a glance

PULSE DURATION

500 ps

WAVELENGTHS

532 / 755 / 1064 nm

SPOT SIZES

2, 3, 4, 5, 6, 7, 8 & 10 mm

DELIVERY

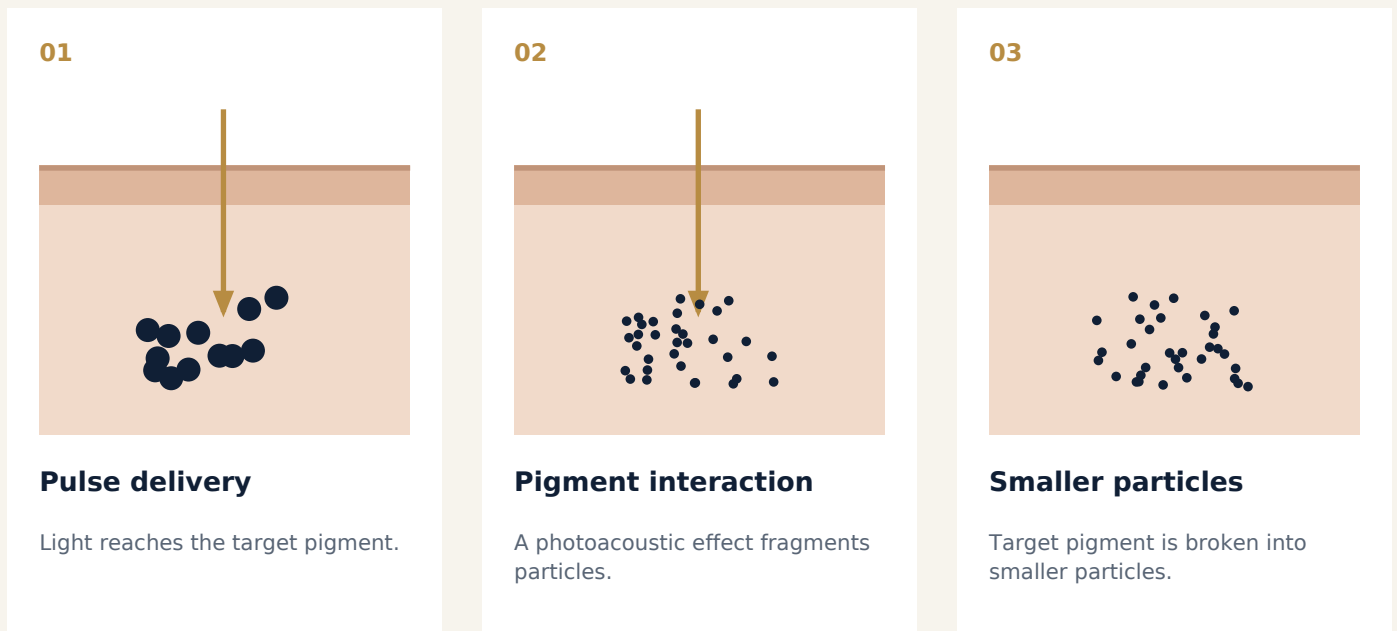

Articulated arm

FORMAT

Mobile console

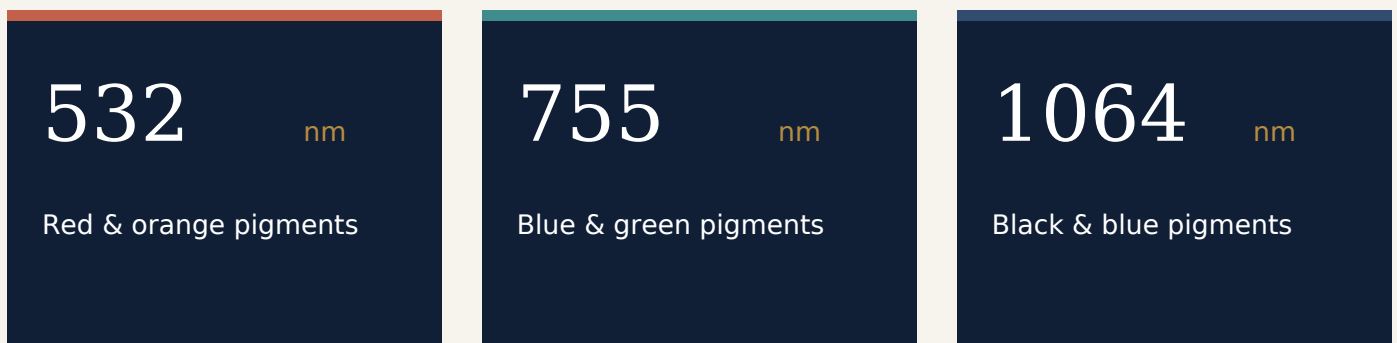

Short pulses. A focused approach.

Picosecond pulses deliver energy over an extremely short interval. A photoacoustic interaction helps fragment target pigment particles.

Three wavelength options

Three wavelength options support a range of pigment-focused applications.

Results

Picolris

Before

After 20 Q-switched Nd:YAG treatments

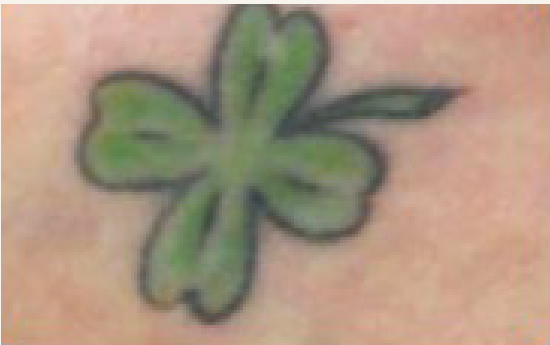

After 6 Picolris treatments

Before

After 3 Picolris treatments

Before

After 3 Picolris treatments

Possibilities for your practice.

Aesthetic technology,
presented with clarity.

Application overview

Tattoo pigment

Tattoo and selected cosmetic pigment applications.

Pigmentation

Selected pigmentation concerns following clinical assessment.

Skin rejuvenation

Carbon-assisted aesthetic applications.
