

AESTHETE WELLNESS

ThermaBlanket

Infrared body wrap system

Personal warmth. Thoughtful design.

Far infrared

Heating technology

180 × 90 cm

Blanket dimensions

Handheld

Digital controller

Warmth, beautifully simple.

ThermaBlanket combines a far-infrared body wrap with a handheld controller and a foldable format for storage and transport.

Specifications

Heating

Far infrared

Blanket size

180 × 90 cm

Outer material

PU leather

Inner material

TPU

Insulation

Mineral wool

Packaging

47 × 47 × 27 cm

Designed around everyday ease

Wrap design

A full-length blanket with a shaped neck opening and zip closure.

Compact storage

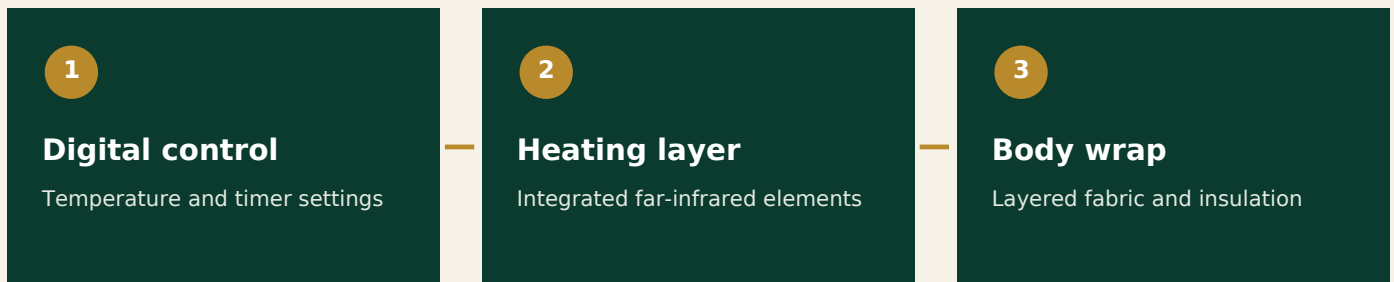

The blanket folds down for storage between sessions.

Carry bag

A matching bag keeps the folded system together for transport.

How It Works

Far-infrared heating elements are integrated within an insulated wrap. A handheld controller provides separate temperature and timer adjustments.

Controller

Clear digital readouts and dedicated controls bring temperature and timing together in one handheld unit.

Dual display

Separate numerical displays show temperature and time.

Temperature controls

Dedicated up and down buttons adjust the temperature setting.

Timer controls

A separate pair of buttons adjusts the session timer.

Power button

A central power button provides a clear control point.

Make room for warmth.

A body wrap system for personal wellness spaces and professional service rooms.

A flexible wellness format

Spa & salon

A warming body-wrap format for beauty and wellness settings.

Personal wellness

A foldable system for dedicated relaxation spaces at home.

Storage & transport

Folded blanket, handheld controller and matching carry bag.
